CAREER OBJECTIVE

Final-year Computer Science undergraduate seeking a Graduate Engineer Trainee role at Wipro Limited. Hands-on project experience covering data validation, database queries, unit-level verification, and structured documentation of results — built through full-stack, data engineering, and machine-learning projects. Strong fundamentals in SQL and Python, quick to learn new enterprise platforms and tools, and comfortable following defined testing guidelines to deliver accurate, well-documented outcomes.

TECHNICAL SKILLS

Languages & Querying: SQL, Python, Java, C, C++, JavaScript

Testing & Data Validation: Unit testing, test-data preparation, database checks/queries, confusion matrix & classification-report evaluation, results documentation

Enterprise Platforms: Basic working knowledge of Health and Welfare (HW) Tech

Databases: MySQL, MongoDB, JDBC

Web & Data Tools: Node.js, React, Pandas, NumPy, Power BI, Excel

Platforms & Tools: Git/GitHub, VS Code, Jupyter, Postman, JIRA (academic exposure)

RELEVANT PROJECT EXPERIENCE

Enterprise Sales Analytics — Sales Intelligence & Customer Analytics Engine — *Python, SQL, Power BI, DAX*

- Wrote and validated SQL queries against a Star Schema data warehouse; performed database checks to confirm data accuracy before building analytics-ready reports.
- Documented ETL pipeline outcomes and cohort-analysis results in structured formats for stakeholder review.

Brain Tumor Detection using MRI Images — *Deep Learning, CNN, TensorFlow, OpenCV*

- Prepared and split test datasets, ran systematic model evaluation, and verified expected vs. actual outcomes using a confusion matrix and classification report (76% accuracy, 0.75 weighted F1-score).
- Documented test results and findings per evaluation cycle to track model performance improvements.

EcoSentinel — IoT Solution for Wildlife Conservation — *MERN, IoT, Socket.io, JWT*

- Built and unit-tested REST APIs for tracking and alert management; verified alert-trigger logic (geofence breach, abnormal vitals, low battery) against expected results.
- Created an IoT data simulator to generate controlled test data for validating the real-time alert pipeline.

Cricket Score Predictor — *Python, XGBoost, Scikit-learn*

- Prepared training/test data splits from ~19,000+ historical match records and validated model accuracy against held-out test data (R^2 0.85, MAE 8.49 runs).

WORK EXPERIENCE

Cloud Computing Intern — Aagaaz Training Centre Pvt. Ltd. (Remote)

Dec 2025

- Completed a 4-week structured program on cloud computing fundamentals and service models, scoring 88% in the final evaluation — demonstrating ability to quickly learn and apply new technical guidelines.

Signal & Telecommunication Intern — East Central Railway (ECR), Danapur Division

Jun 2025 – Jul 2025

- Studied and documented network operations and maintenance procedures for mission-critical, high-availability communication systems, following defined technical standards.

Robotics Intern — InfinityCore Technologies (BlinkSkills) (Remote)

Jan 2024 – Feb 2024

- Applied structured, guideline-driven problem-solving to practical robotics assignments, scoring 92% in the final assessment.

EDUCATION

B.Tech, Computer Science and Engineering

Oct 2022 – May 2026

Shershah Engineering College, Sasaram

Intermediate (Science, PCM)

May 2018 – Jul 2020

RB College, Dalsingaraya
